

2018 Electric Supply Environmental Attribute Information Town of Webster PowerUp Program

The electric supply product you have purchased from First Point Power meets the minimum requirements of the Commonwealth's Renewable Energy Portfolio Standard.* By law, First Point Power is required to disclose to customers the following non-price information related to the product: (i) power sources; (ii) air emissions; and (iii) labor characteristics.

POWERUP STANDARD - POWER SOURCES

Renewable Portfolio Standard Resources	
Wind	3%
Waste to Energy	3%
Solar	6%
Biomass	7%
Other	2%
Total	21%

System Power	
Natural Gas	30%
Nuclear	23%
Oil	6%
Coal	6%
Large Hydro	4%
Other	10%
Total	79%

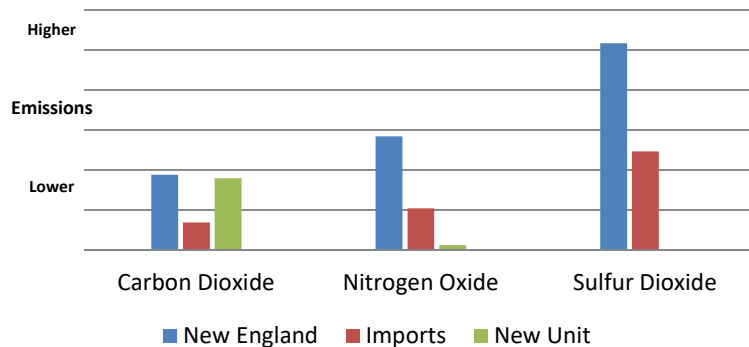

POWERUP GREEN - POWER SOURCES

100% Renewable Option Resources	
Class I	14%
Class I added by Town of Webster	20%
Wind projects outside of New England	66%
Total	100%

Additional RECs will be purchased to meet the full Massachusetts RPS obligation.

AIR EMISSIONS

The production of electricity to support your product results in the emission of air pollutants such as carbon dioxide, nitrogen oxide, and sulfur dioxide. This graph compares the air emissions of (i) the regional system average, (ii) imports to New England, and (iii) a new natural gas power plant.

LABOR CHARACTERISTICS

28% of the product's electricity came from power sources with union contracts with their employees.

NOTES

* For more information on the Renewable Energy Portfolio Standard, visit the Massachusetts Department of Energy Resources website at <https://www.mass.gov/orgs/massachusetts-department-of-energy-resources>.
