

## TOWN OF SUTTON

4 UXBRIDGE ROAD  
SUTTON, MA 01590

### **Electricity Supplier Change for Sutton Power Choice Program Requires No Action from Participants**

SUTTON, MA. With January 2020 electricity meter reads, the electricity supplier for the Sutton Power Choice electricity aggregation program will change from Agera Energy to Constellation. This change is the result of Agera Energy's chapter 11 bankruptcy proceeding. As part of this change, Constellation has committed to honoring the original terms of Sutton's electricity supply contract with Agera Energy with no change in price or price term. No action is required by Sutton Power Choice participants as a result of this change.

With Constellation, Sutton Power Choice will continue to offer the same competitive prices that were offered with Agera Energy:

- 10.930 cents/kWh for Power Choice Standard, which is the default program offering and the offering that most Sutton Power Choice participants are enrolled in
- 10.952 cents/kWh for 100% renewable electricity with the Power Choice Green option.

Both prices are lower than National Grid's current 6-month winter Basic Service price.

Additional details:

- Sutton Power Choice prices will remain fixed until January 2021, as originally stipulated in Sutton's contract with Agera Energy.
- Participants in Sutton Power Choice are free to leave, or opt out, of the program at any time with no fee or penalty.
- The transition from Agera Energy to Constellation will be seamless for Sutton Power Choice participants. The only change participants will see is that Constellation NewEnergy, Inc., will be listed as their electricity supplier on their National Grid electricity bills beginning in February 2020.

For more information about the change from Agera Energy to Constellation, participants can feel free to call the Town's consultants at 1-844-483-5004.

### **About Sutton Power Choice**

Sutton Power Choice is a municipal electricity aggregation, which is a type of group electricity purchasing program. The program is a Town-vetted alternative to National Grid's Basic Service and to commercial electricity supply offers in the marketplace. Through Sutton Power Choice, the Town of Sutton uses the bulk purchasing power of the community to select an electricity supplier for Sutton residents and businesses and secure a competitive electricity supply price.

Sutton Power Choice does not replace National Grid as Sutton's electric utility; rather it changes the price that is used to calculate the supply services portion of participants' National Grid electricity bills. New electricity accounts in Sutton are automatically enrolled in Sutton Power Choice, in accordance with state law, however, participants are free to leave, or opt out of, the program at any time with no fee or penalty.

While the Town's goal is to provide a competitive price through Sutton Power Choice, the program cannot guarantee to provide savings compared with National Grid's Basic Service price. National Grid's price changes ever 6 months for residential and commercial customers and ever 3 months for industrial customers, and future prices are not known.

More information about Sutton Power Choice is available at [masspowerchoice.com/Sutton](http://masspowerchoice.com/Sutton) or by calling the Town's program consultants at 1-844-483-5004.
